Produktinformationen "LabQuest Viewer"

Description

LabQuest Viewer is computer software that displays and controls the screen of a LabQuest using a computer. When used in conjunction with a projector, this software can be used to demonstrate the functions of LabQuest and to enhance group presentations. This software can also be used to monitor student use of LabQuest devices in your lab, view and control a LabQuest remotely, and easily capture LabQuest screen images for use in lab instructions or assessment questions.

Use LabQuest Viewer in the classroom to:

- View and control one or more LabQuest devices from a computer
- Use with a projector or interactive white board for class demos and student presentations
- Display live images of all LabQuests in your lab to monitor student progress throughout the lab
- Select up to four LabQuest devices for side-by-side comparison of experimental results from different lab groups
- Capture and share screenshots of the LabQuest screen for use in lab instructions and assessment questions
- Set customizable permissions that permit viewing without control, or password-protect a connection
- Install LabQuest Viewer on any computer in your school or college department with the included [site license](#)

LabQuest Viewer für iPad

**Bildungsstufe:** Tertiäre Bildung, Zyklus 3**Betriebssystem:** Android, iOS, Mac OSX, Win
