Produktinformationen

"Motion Encoder Cart Upgrade Kit"

The Motion Encoder Cart Upgrade Kit is for users of the Vernier Dynamics Cart and Track System (DTS) who want to add Motion Encoder capability. The kit allows the user to upgrade one existing cart to a Motion Encoder Cart and includes the Motion Encoder Receiver ([MEC-BTD](#)) and a Motion Encoder Long Track Strip (METS-LONG). One-time assembly requires removing a cart end cap, installing a transmitter unit underneath the cart, and installing a replacement end cap. Compatible with Vernier Dynamics Cart and Track System only. The Motion Encoder Long Track Strip can be trimmed to fit the 1.2 m dynamics track.

Position resolution:

1 mm

Maximum useful data rate:

30 Hz

Included:

Motion Encoder Transmitter Parts
Motion Encoder Receiver
Motion Encoder Long Track Strip
Allen wrench

[User manual](#)**The Motion Encoder**

Transmitter requires two AAA batteries (not included).

Bildungsstufe: Tertiäre Bildung**Fach:** Physik, Vernier
